EXECUTIVE SUMMARY

The journey of QH Agritech began in 2024 as a company focused on agribusiness technology solutions. With a vision to become a leader in the digital agribusiness sector, QH Agritech has rapidly grown through technological innovations such as the Internet of Things (IoT), digital platforms, and customizable software to meet the needs of agribusiness players.

As times progress, QH Agritech is committed to assisting agribusiness stakeholders, from farmers to distributors, in creating a more efficient, transparent, and sustainable agribusiness ecosystem. By combining technology with a collaborative approach, we continuously support the digital transformation in the agribusiness sector to enhance productivity and the industry's competitiveness.

QH Agritech also offers various innovative services that support every stage of the agribusiness supply chain, including standardization, monitoring, auditing, and inspection. With an extensive partner network and deep industry experience, we are ready to lead the shift toward a modern, highly competitive agribusiness.

Ghanis G Setya

Co-Founder & Chief Executive Officer

ABOUT THE COMPANY

QH Agritech, founded in 2024, aims to transform the agribusiness sector through innovative technology. The company focuses on delivering solutions such as IoT-based land management, digital platforms for price transparency, and customizable software tailored to the diverse needs of agribusiness. From the start, QH Agritech has experienced rapid growth, driven by its commitment to improving efficiency, productivity, and sustainability.

Emphasizing data-driven decision-making, QH Agritech offers a portfolio that includes smart farming IoT solutions, real-time data analytics, and customizable management systems for various agricultural sectors. The company addresses key challenges in the agribusiness supply chain, from crop health monitoring to ensuring transparency in commodity pricing.

QH Agritech is also committed to building sustainable development through its Modern Agricultural Platform (MAP), which promotes regenerative practices and green businesses. Collaborating with stakeholders across agriculture, livestock, fisheries, and plantations, QH Agritech is positioned as a leader in the agribusiness revolution.

WHO WE ARE

QH Agritech is a company operating in the agribusiness sector, focusing on the implementation of innovative technology-based solutions. We help improve productivity and efficiency across the agribusiness supply chain through cutting-edge technologies, including standardization, monitoring, auditing, and inspection. With extensive experience and a global partnership network, QH Agritech is ready to support the digital transformation of the agricultural sector.

A leader in technology-based agribusiness solutions.

Key Strengths

Expert in the implementation of international standards and IoT technology in the agricultural sector.

Committed to sustainability, innovation, and collaboration.

THE SOCIAL & ENVIRONMENTAL RESPONSIBILITY OF THE COMPANY

QH Agritech is dedicated to benefiting the environment and its stakeholders through a focused and accountable Corporate Social and Environmental Responsibility (CSER) program. This initiative supports the growth of MSMEs, empowers agribusiness communities, enhances farmers' welfare, and promotes environmental sustainability using eco-friendly technologies.

Funded by the company's budget and in partnership with various organizations, QH Agritech supports sustainability projects like agricultural technology education, waste reduction, and improved access to modern, eco-friendly farming technologies. The company prioritizes both business success and long-term positive impacts on society and the environment.

OUR VISION AND MISSION

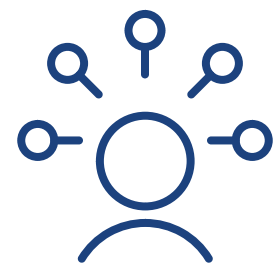

Vision

To become the leading provider of agribusiness solutions that empower farmers and agribusiness players through technology, innovation, and standardization, in order to create a sustainable, efficient, and highly competitive agribusiness sector in the global market.

Mission

- To enhance productivity and efficiency in the agribusiness sector through the application of digital technology and the Internet of Things (IoT).
- To provide standardization, monitoring, auditing, and inspection services to ensure agribusiness products meet international standards with a platform that facilitates price transparency and supply chain integration in agribusiness from upstream to downstream.
- To support farmers and agribusiness players in managing land, livestock, and fisheries with accurate data for better decision-making.
- To promote collaboration with the government, institutions, and stakeholders to advance Indonesia's agribusiness sector on the international stage.

COMPANY VALUES

COMPETENT

To develop Human Resources (HR) with integrity and ready to face all forms of challenges in the future.

COLLABORATIVE

An approach based on local wisdom, supported by standardization, to create competencies in the agribusiness sector.

SUSTAINABLE INNOVATION

Creating innovative technology to support sustainable production management across all eras.

QUALITY ASSURANCE

Creating products that meet food safety assurance standards.

LOYALTY

Continuous assistance supported by a spirit of openness.

Yuda Pratama

Co-Founder & Chief Product Officer

- Increased Consistency
- Simplification of Training
- Sustainability Improvement
- Increased Satisfaction
- Reduce the Risk

STANDARDIZATION

We establish consistent quality standards and procedures to ensure optimal outcomes in every aspect of agribusiness.

We perform detailed inspections to ensure every process and product meets the established specifications and quality.

INSPECTION

- Sustainability Product
- Increase Quantity Product
- Reduce Repair & Return Cost
- Production Efficiency
- Prevent Product Failure
- Fulfillment Regulatory & Standardization
- Quality Assurance
- Reduce Variability Product

MONITORING

We regularly monitor all activities to ensure compliance with standards and to identify potential issues early on.

We conduct thorough audits to assess adherence to standards and best practices in agribusiness operations.

AUDITING

- Consistency Quality
 - Detect and Prevent Defects
 - Increase Process Efficiency
 - Fulfillment of Standards & Regulation
 - Customer Satisfaction
- Detecting Inconsistency
 - Reduce Production Risk
 - Transparency & Accountability
 - Supporting Certification & Accreditation

QH AGRITECH PRODUCT AS TECHNOLOGY SOLUTIONS FOR AGRIBUSINESS

1 Q-Learning Center

- QH Agritech will provide information on technical and non-technical management developments in agriculture and livestock.
- Our trainers are professionally competent in food safety assurance supervision.
- A training center is one pathway to advance the agribusiness sector, providing educational support for farmers and livestock breeders.

- QH Agritech can serve as a supporter in the agricultural commodity trading business.
- We will ensure quality and quantity for all business partners.
- Standardization, transparency, and integrity assurance provide a solution for secure transactions.

2 Q-Trading Center

3 IoT-Based Solutions for Farm Management

- QH Agritech utilizes Internet of Things (IoT) technology to optimize agricultural land management.
- Advanced sensors and IoT devices enable automated monitoring, providing real-time data on soil moisture, temperature, and crop conditions.
- With this solution, farmers can manage resources more efficiently, reduce operational costs, and increase crop yields.

- The QH Agritech digital platform helps create better price transparency between suppliers and buyers throughout the supply chain.
- With data-driven decision-making features, agribusiness players can plan the distribution and sale of products more effectively, optimize profits, and reduce market uncertainty.

4 Q-Control Room (Dashboard Monitoring)

PARTNERSHIPS & COLLABORATIONS

We continuously seek partnership opportunities with industry players, organizations, and institutions that share the same vision to support the growth of agribusiness in Indonesia and globally. With strong collaboration, we believe we can make a greater impact for farmers and agribusiness stakeholders.

Strategic partnership with agricultural associations,

to enhance technology penetration in the local agricultural sector.

Education and training program,

for farmers in the use of modern agricultural technology.

Let's Work Together

We believe that the future of agribusiness lies in technological innovation and collaboration.
QH Agritech is committed to being a reliable partner in your agribusiness journey.
